WAJR
AM 1440

May 22, 1987

Bill Burrows
708 Division Street
Gloucester City, NJ 08030

Dear Bill:

This is to confirm that you did indeed receive our signal on April 6th, 1987 at 7:00 p.m. I have checked our logs and we did carry ABC news at that time.

I am sorry to hear that you have had poor response from West Virginia stations on DXer verification requests. Our station appreciates reports like yours as it helps us to know how our station is being received.

You might be interested to know that although our daytime power is 5,000 watts, our nighttime power is only 500 watts. During the time you briefly heard us on 1440 Khz, we were at full day power.

Our radio station is located in Northern West Virginia about 70 miles south of Pittsburg.

Thanks for letting us here from you.

Sincerely yours,

Jeffrey Fritz
Director of Engineering
